

THE
GREENERY

742 East Olive St., Turlock, CA 95380 • (209) 632-4214
www.greenerynsy.com

Thank you for purchase of a plant from The Greenery.

The staff at The Greenery chooses plants carefully for those varieties that are best suited for growth in the Central Valley. Our objective is to provide you with the plants and services that enable you to be successful in your gardening efforts.

Our Guarantee

TREES & SHRUBS: We will gladly replace any woody or perennial ornamental plant (with the exception of Dogwoods, Daphnes, Maytens and bedding plants) that dies of any disease condition within 6 months with your receipt. This applies once to any plant replaced. We do not guarantee plants that have been improperly planted and/or improperly watered.

CUSTOMER RESPONSIBILITIES UNDER THE GUARANTEE

You, the customer, is expected to:

- Call The Greenery as soon as there is a concern about the plant's performance.
- Keep the sales receipt
- Follow the planting instructions
- Follow the watering instructions
- Take close up photos of the entire plant and/or bring in samples (not the entire plant), if requested by staff.
- Bring in the plant only if requested by our staff.
- Remove plant material from our premises as soon as is practical. Material left after 60 days (without prior agreement) will be considered abandoned. Abandoned material will then be restocked with no credit or refund offered.

BAREROOT TREES. Any bareroot tree that does not leaf out, we will credit you the purchase price toward a container grown plant, another bareroot or we will refund your money, within 6 months of purchase, with your receipt, see Customer Responsibilities, above.

**GUIDE TO SUCCESSFUL PLANTING
WITH BIODEGRADABLE POTS**

1. Water plants before planting.
2. Dig a hole twice as wide and 1 1/2 times deeper than the container. Mix the soil with Gardner & Bloome Starter Fertilizer and Gardner & Bloome Planting Mix. Return a few inches of the mixture to the hole.
3. Make 3 to 4 slits in the side of the pot beginning half way down the pot and continuing to the bottom. Place the pot at the correct depth. The top of the root ball should be at ground level, slightly visible after planting. You may trim the top edge of the pot down to the top of the root ball if desired. **IMPORTANT: DO NOT REMOVE PLANT FROM CONTAINER**
4. Fill in the hole with the soil-fertilizer mixture.
5. Build a 2 inch watering basin around the plant.
6. Water 2-3 times after planting. **RULE OF THUMB:** At each watering a #1 size plant needs 1 gallon of water, a #5 size plant needs 5 gallons of water, etc.
7. A 1 inch mulch with, Gardner & Bloome Soil Building Compost or extra planting mix, over the soil will keep the root ball cool.
